Your estimated volume of used lead acid batteries (Tonnes) per annum: _____

Requested number of Battery Containers: _____

Do you want Battery Rescue to generate a Recipient Created Tax Invoice (RCTI Form to follow): Yes No

Terms of Service

1. Battery Rescue has the exclusive collection rights over the used lead acid batteries that are collected in the BTS Container.
2. Payment for the batteries will be made to the Customer via EFT to the Customer's bank account within 14 days of any deliveries made to Battery Rescue's yard (or nominated contractor's yard).
3. The amount paid per kg may vary due to fluctuations in the LME price for Lead. In the spirit of transparency, Battery Rescue will publish on its webpage batteryrescue.com.au/prices, its current price schedule.
4. Payment for the first used lead acid battery collection will not be made, as this will serve as an (Establishment Fee) for the BTS Container and associated Used Battery Collection Service.
5. Except in relation to fair wear and tear, the Customer remains responsible and liable to Battery Rescue for any significant damage or loss of a Container within its possession. The replacement cost for a container is \$1500 + gst.
